

RF/Microwave

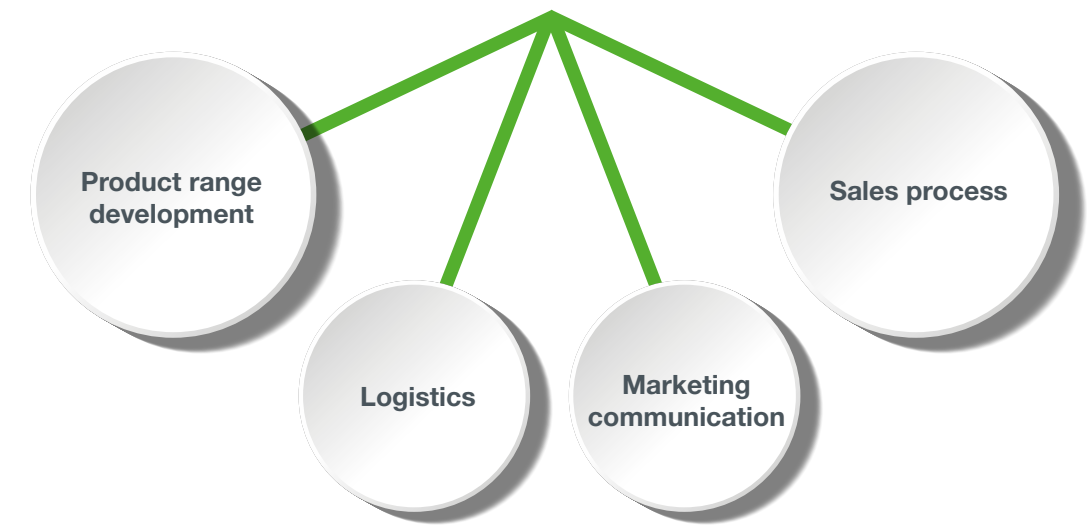

EXTENSIVE APPLICATION KNOWLEDGE AND A COMPREHENSIVE RANGE.

OEM Electronics markets components and equipment for electronics and apparatus manufacturers in Northern Europe. For more than 20 years, we have helped industries to develop world-leading products.

Together with our suppliers, which belong to the leaders in their respective areas, we can offer the right choice for our customers application.

This enables us to provide our customers with the right component and solution for every need, as well as providing expertise and service efficiently.

Urban Malm, CEO

BENEFITS TO YOU AS A CUSTOMER:

- ▶ Access to components from several manufacturers.
- ▶ Offering extensive knowledge of the components.
- ▶ Complete solutions with additional components.
- ▶ Reduces the number of suppliers.
- ▶ Deliveries on time in the right place.
- ▶ Ensures high quality in the product.

OUR PRODUCT RANGE

We offer a wide range of products including, but not limited to the following

- Fans
- Cooling solutions
- Thermal materials
- Heaters
- Thermostats
- Temperature limiters
- Switches
- Indications
- PCB protection
- Casting & gaskets
- Low pressure molding
- Soldering
- Adhesives
- Underfill
- Membrane keyboards
- Silicone Rubber keyboards
- Piezo keyboards
- Capacitive keyboards
- Displays
- Monitors
- Display covers
- Silicone details
- Batteries
- Capacitors
- Power supplies
- RF/Microwave
- Transformers
- Choke coils & inductors
- EMC

Knowledge. Availability.

KNOWLEDGE

We have extensive experience from different industries and projects.
We spend all our time on what our customers are doing a few times a year.

Our product specialists and salesmen ensure that you always the right advice
and solutions for every situation.

AVAILABILITY

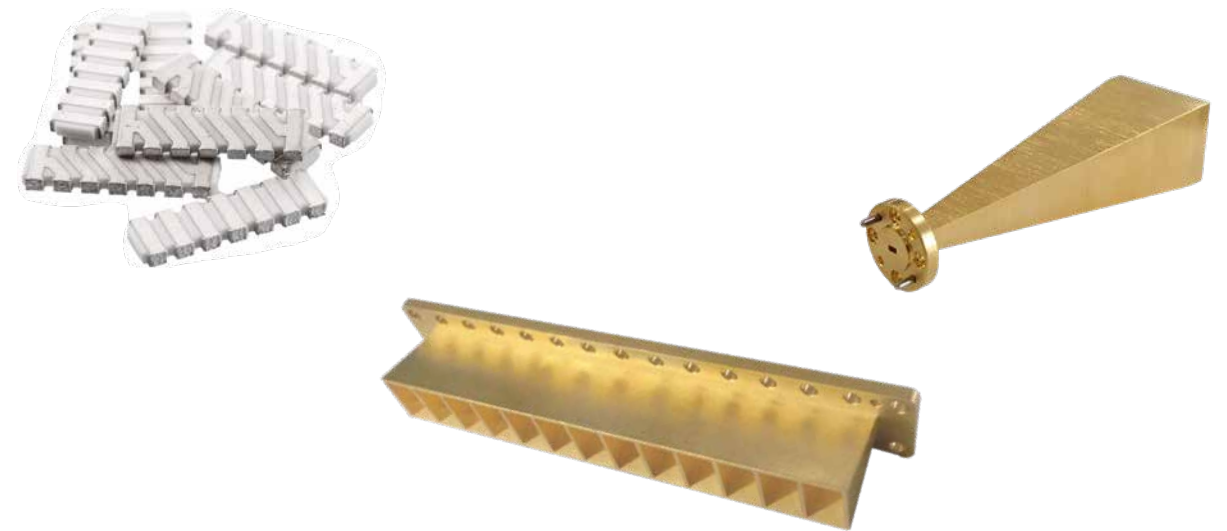

We are here for you to make your projects run smoothly and in the right direction.

With personal sales ,close and frequent communication, we want our customers
to feel safe in our cooperation with us.

Long-term cooperation with an established partner.

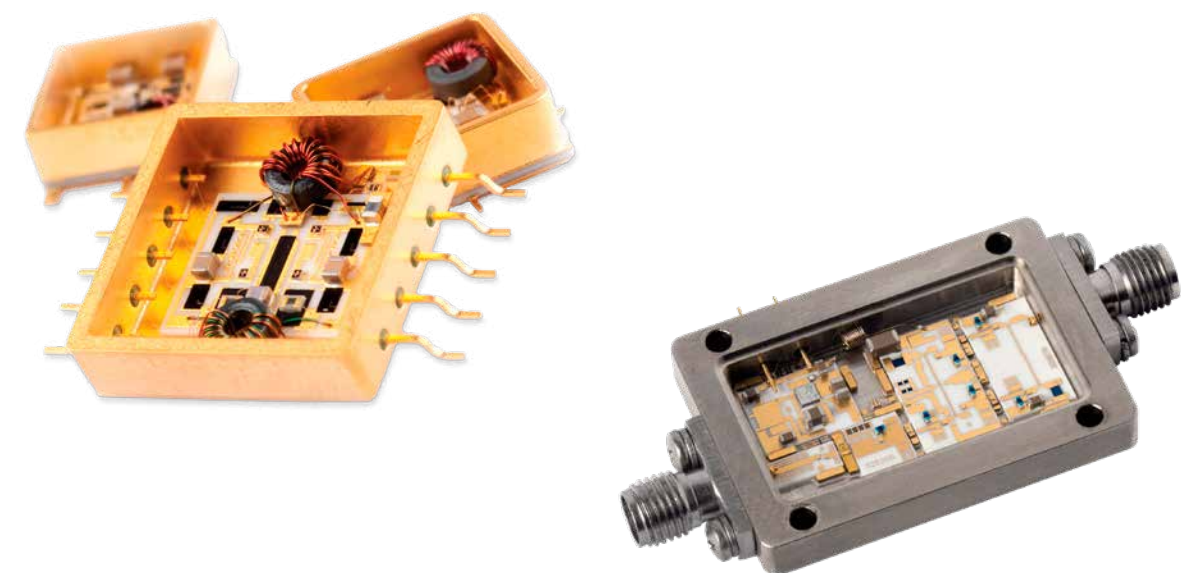

Antennas, Feeds & Probes

Chip antennas • Customized antennas • Waveguide probes • MM-wave antennas • Microwave antennas
Mobile backhaul antennas • Slotted array antennas • Standard gain horn antennas • Broadband horn antennas

Amplifier modules

Complete power amplifiers • EMI shielded low cost amplifiers • Low noise amplifiers • High power amplifiers
Microwave power modules (Mpm's) • Solid state power amplifiers • Klystrons and magnetrons

Cables & Connectors

Coaxial cables • Jumper cables • Hybrid cable solutions for FTTA solutions
Fiber optic components • RF/MW coaxial connectors • Reciever protectors

EMI/RFI filters & Capacitor solutions

Customized filter assemblies • Feed-through filters • Surface mount

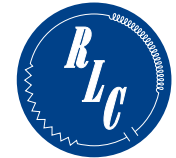

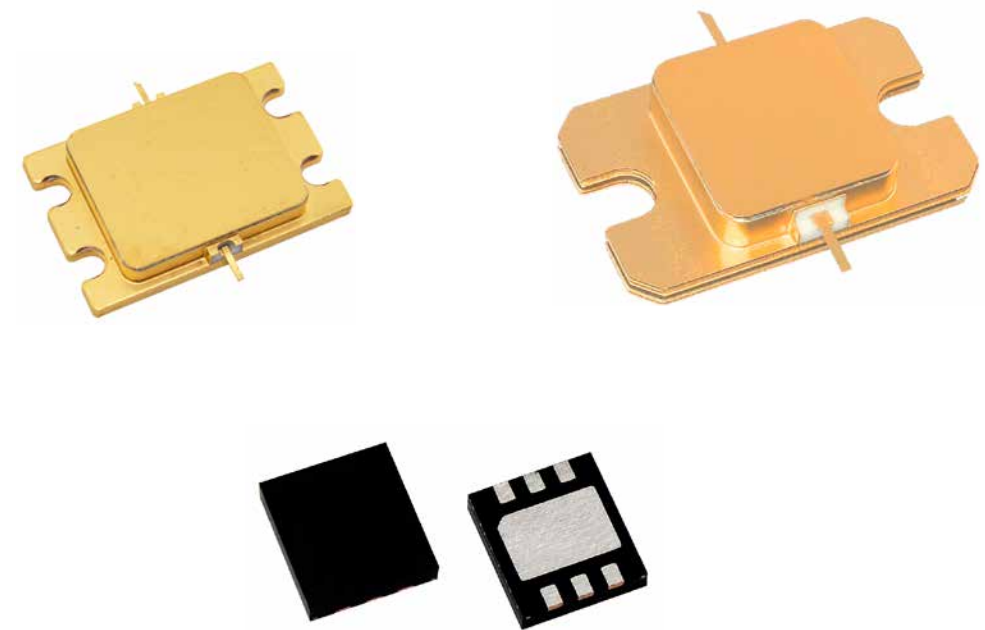

Components

Switches • Circulators • Isolators • Combiners & dividers • Couplers • Modulators • Monopulse comparators

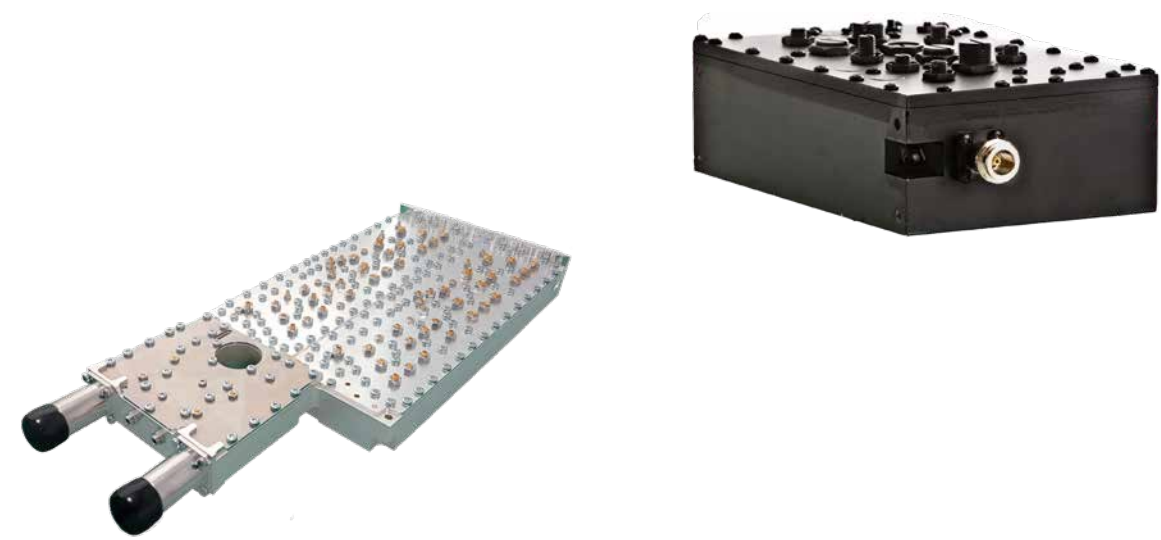

FETs, Power amplifiers & MMICs

GaAs HEMTs • GaN HEMTs • High power amplifiers • Power GaN
Low Noise Amplifiers (LNA) • Small signal GaAs FETs • Power GaAs

Filters

Bandpass Filters • Ceramic Filters • Cavity Filters • Combine filters
Diplexers & Duplexers • SAW Filters • Interdigital Filters

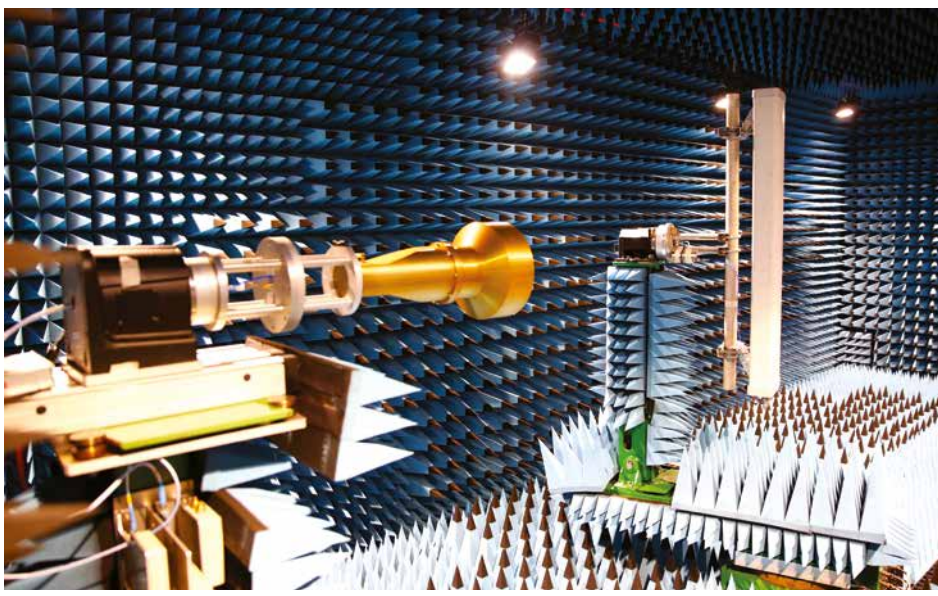

Waveguide products

Waveguide components • Bends • Pressure windows • Tees • Rotating joints
OMTs • Elliptical waveguides Flanges • Flexible waveguide components

Test & measurments

Complete systems for antenna measurements • Near-/far field ranges
Anechoic chamber • Compact antenna test ranges • Positioning systems

YIG

YIG Synthesizers • YIG Oscillator • YIG Filters

A part of OEM INTERNATIONAL
Listed on the Stockholm Stock Exchange

- 34 operations in 14 countries
- 25 000 customers
- 300 suppliers
- 295 million EURO in sales

Local presence with the world as a market

LOCAL PRESENCE

We are close to you so that your projects run smoothly and in the right direction.

We act as a natural resource in our customers' development. Our application expertise enables us to guide and support the projects from needs analysis to fully developed products. Everything to find the right solution to each and every need.

With personal sales and close and clear communication, we want our customers to feel safe in our cooperation with us.

THE WORLD AS A MARKET

In order for you to be able to manufacture efficiently, we make sure that delivery comes wherever you want. Both in the development phase and in production.

We ship to the whole world and ship the products wherever you want them. No matter where in the world, we ensure that you get the right products at the right place, on time.
